

**Turn your Microsoft[®] Surface Pro 7
into a magnifier and screen reader**

Microsoft Surface Pro 7 not included.

The ONYX PRO is an advanced tablet based magnifier with OCR capabilities.

Perfect for people who want to combine magnification and speech with their Surface Pro 7 in one device.

When connected to your Surface Pro 7, you can magnify near and distance, scan and read, record video, and save documents.

ONYX PRO easily connects to your Microsoft Surface Pro 7 to magnify text or have text read aloud.

The ONYX PRO uses a simple USB cable to connect to your Microsoft Surface Pro 7, allowing you to magnify objects, text, or images. Just place your Surface Pro 7 in the ONYX PRO stand, unfold the camera, and attach the camera to the stand and you are ready to go.

Featuring a dual-camera design for flexibility, one camera allows you to easily go from near magnification to distance viewing. The second camera is dedicated to Document OCR (optical character recognition) mode that scans printed text and reads it back to you out loud in a clear and natural voice. Simply place a book, printed letter, or magazine beneath the camera and with the press of a button, ONYX PRO begins to read. Follow along as the text is magnified and displayed in high contrast on your tablet screen.

The ONYX PRO is great for reading books, magazines, mail, and more! Thanks to its lightweight design and handle, you can pick it up and use it wherever you want from classroom to classroom or office to home.

ONYX PRO Features:

- Two dedicated cameras - one for magnification and one for text to speech
- Magnification range of 1.5X to 32X
- Color contrast options
- Touch screen menu buttons
- Built-in LED Light
- Stand folds up for easy storage
- Integrated handle for easy transport
- Compact size minimizes space needed on table or desk.
- Approximate weight 4.2lbs (excluding Microsoft Surface Pro 7)
- OCR mode scans and reads printed text back to you aloud
- Save scanned images and documents to your Surface Pro 7
- Record and save videos for viewing later
- Connect a headset for privacy while listening to documents
- Integrates with ZoomText
- Microsoft Surface Pro 7 NOT INCLUDED

ONYX PRO easily connects to your Microsoft Surface Pro 7 to magnify text or have text read aloud.

The ONYX PRO is designed and built using the Additive Manufacturing Process. This process allows us freedom of design and the ability to manufacture complex structures while minimizing waste and keeping the product lightweight and portable. We are also able to quickly adapt our designs as new tablet models are released. This faster time to market means we will have product easily available.
